## JS720 gluing machine(with heater)

The gluing machine is professional equipment for gluing the paper in printing and packaging field. It adopts the stainless steel and steel alloy which improves the ability of anti-corrosion; and the adjustable motor to satisfy the requirements form different papers. It has the merits of beautiful appearance, simple structure, balance transmission, convenience repair etc.

Features:

1. It can use hot melt glue and cold glue.
2. The heater could be turned off when it use cold glue.
3. The heater is heating the water to melt the hot melt glue.

### Main Technical Parameter:

Model	JS720
Gluing width	≅ 720mm
Gluing thickness	≅ 300g
Feeding speed	23m/min
Motor power	125w/220v
Machine weight	130kg
Machine dimension(L×W×H)	1120×500×440mm
